

Cost Analysis

Switching from film and chemicals to Medstrat's PACS system is one of the smartest and most economical decisions an orthopedic practice can make.

Cost Analysis

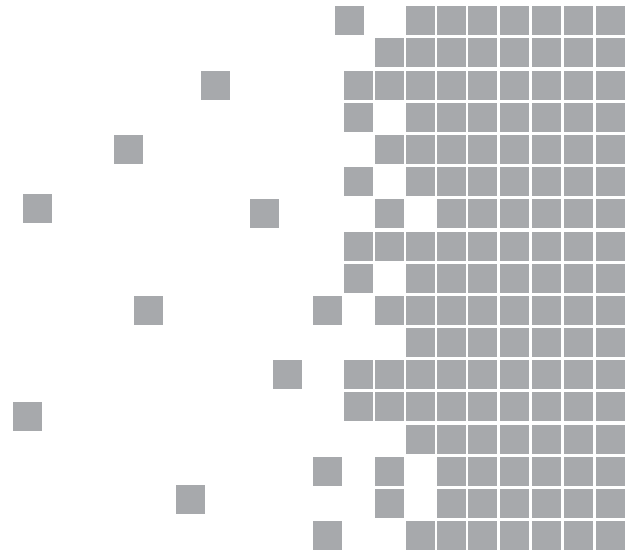

Switching from film and chemicals to Medstrat's PACS system is one of the smartest and most economical decisions an orthopedic practice can make towards improving their efficiency and profitability. Time and time again, Medstrat has provided detailed cost analyses for countless customers showing how film and chemicals cost more than switching to echoes.

Although each cost analysis is different and uniquely suited to the details of a particular practice, we can provide a general cost analysis that applies to the majority of orthopedic practices today. We will assume the following for this example:

Average number of orthopedic surgeons in a typical practice	2
Number of studies an average orthopedic surgeon performs per month	100
Average number of x-rays taken per study	2.5
Average cost of film, chemicals, jackets, labels etc. per x-ray	\$2

We can calculate that the cost of film, chemicals, jackets, labels, etc. per surgeon per month is on average \$500 ($100 \times 2.5 \times \2).

The above figure does not include the cost of added labor and time involved with the physical handling, filing, storage and retrieval of film, nor does it include the office space required to store an ever growing library of film based x-rays. In our studies, we have found that on average these additional costs equate to an additional \$3 per x-ray for a total of \$5 per x-ray.

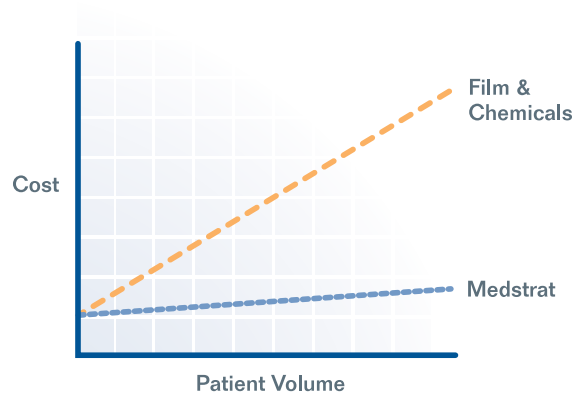

The more your practice grows, the more money you will save in the long run.

The cost of using film & chemicals for a typical orthopedic practice with 2 surgeons is \$2500 per month.

For an orthopedic practice of the same size, a Medstrat PACS system can be configured for a cost of less than \$2500 per month.

Additionally, if your practice grows, the cost of film & chemicals grows at a much higher rate than the cost of additional capacity and components in a Medstrat PACS system. The more your practice grows, the more money you will save in the long run.

Need More Convincing?

If you're interested in learning exactly how much money Medstrat can save you, please contact us and we'll schedule a Medstrat sales representative to provide you with a detailed cost analysis specific to your orthopedic practice. We're convinced that you'll be pleasantly surprised at the results.
