

Secure DICOM Archive Solution

Does your disaster recovery plan include off-site archiving of your medical images? Can you easily access your images in the cloud from any PC or mobile device?

Protecting patient privacy and controlling costs are crucial components of image archiving. With nearly two decades of image archival

service, Medstrat has the experience and resources you need to securely protect your images. Joints Archive maintains more than a billion images from installations all across North America.

Solution Details

- Backup DICOM data from any PACS
- Access images anywhere, anytime
- Leverage the stability of a Tier III datacenter
- Enjoy flexible retention terms
- Receive peace of mind with secure, HIPAA/HITECH compliant storage

Joints Archive Benefits

- Secure and automatic data transfers
- Always-on, real-time data access
- Quick data restoration on-demand
- Expert data administration using the latest technologies
- Simple cost structure (no long-term contracts, no per-access fees)
