Position Title: System Administrator
Department: Operations
Reports To: Operations Manager

Summary

Medstrat is seeking a knowledgeable, results-driven, and experienced System Administrator to help us maintain and evolve our best-in-class orthopedic services. This position is responsible for administrating all cloud and physical data center infrastructure and platforms. All candidates must be domain experts in System Administration with a proven track record of managing networking, storage, and enterprise visualization. The ideal candidate will also be highly knowledgeable about the Google Cloud Platform.

Responsibilities

- Administrate all infrastructure and platforms used by Medstrat systems.
- Work with other system administrators to meet departmental objectives.
- Execute maintenance, system improvement, and build-out tasks.
- Ensure sysem monitoring and alerting.
- Maintain platforms used by quality assurance testing and software development.
- Ensure legacy system is maintained while it is being sunset.
- Implement security measures to mitigate the risk of unauthorized access.

Qualifications

- Bachelor's Degree in Computer Science or significant experience in System Administration.
- Domain expertise in Linux (CentOS, Rocky Linux, Ubuntu) administration, networking, and large-scale storage systems.
- Cloud Computing experience (Google Cloud Platform preferred).
- Exceptional system design and development skills.
- Proven track record of troubleshooting difficult issues.
- Storage (NAS, NFS, Object Storage such as Ceph and GCS).
- Experience with Networking (VPN, NAT, firewalls such as pfsense).
- Virtualization and containers (VMs, LXC, Docker).
- Infrastructure as code (Ansible preferred).
- Superior writing and interpersonal skills.
- Knowledge of MySQL and/or Rabbit MQ Administration is a plus (production).
- Experience with CI/CD especially with GitLab is a plus.
- Knowledge of Site Reliability Engineering is a plus.

Please submit resume and additional documents to jobs@medstrat.com.
